

VeriClouds CredVerify™

EXCLUSIVE NEW CUSTOMER PROMOTIONAL OFFER

Limited Time Promotional Offer

Take advantage of this limited time offer to experience the full power of CredVerify today.

- Perform a single credential verification for compromised credentials at your location under our supervision and support
- Detect and verify your credentials with up to 10M free queries
- Unlimited technical support
- Verification done using VeriClouds Local Service Device with Intel SGX for maximum privacy and security

FREE On-Site Verification of your Credentials

Let a former Microsoft security researcher come on-site to detect a full or partial set of your employee or customer accounts and detect compromised credentials.

Did you know that:

- We recently conducted a leaked credentials verification of a large global airline's user accounts database with a detection rate of 12.8%
- A typical organization may find that between 5-25% of their user credentials already exist in our database
- The average cost of a data breach in the United States rose for the fourth straight year, hitting \$245 per compromised record – the highest it has been since 2006¹ (healthcare costs fall to \$380 per record²)

This is FREE verification of credentials conducted off-line at your premise for maximum security.

Costs

- Free to set up and perform leaked credentials verification
- Reasonable travel expenses reimbursed for travel outside of the Bay Area

This offer is valid until June 15th, 2019

Let VeriClouds show you how we can accelerate your results, reduce your OpEx costs and minimize the risks of working with breach data from the dark web

How can I take advantage of this offer?

Send an email to Stan Bounev at stanb@vericlouds.com
